

Building a Behavior Support Plan

For your case study assignment, use this template and complete each step.
First, dissect the problem behavior using the behavior pathway.

Behavior Pathway

Hypothesized Function (circle one) Escape/Avoid Peer Attention Adult Attention

Next,

Based on the behavior pathway write a sentence that summarizes the student's problem behavior, and generate possible strategies to use for each step of the pathway (A, B, C).

Summary Statement(s)		
Antecedent	Problem Behavior	Maintaining Consequence/ Function
Possible Strategies		
Antecedents	Teaching Replacement Behavior	Modify Consequences

Finally, choose a strategy or set of strategies, and write one to three paragraphs about how you would implement them in the classroom to ensure that you have contextual fit. In your discussion, identify how the strategy might alter and improve the behavior to meet consequences that are more acceptable or desirable in the classroom (the lower and upper pathways of the diagrams in Crone & Horner).
